Camie-Campbell Releases Earth-Friendly Garage Door Lubricant

Tom's Secret Formula Garage Door Lubricant part of new biodegradable line

St. Louis (July 2008) – Camie-Campbell has announced the release of Garage Door Lubricant as part of the company's Tom's Secret Formula Earth Friendly line of lubricants. The new product is designed for lubricating garage-door components such as rollers, hinges, springs, bearings and roller chains and is available for commercial and residential use.

“Garage Door Lubricant is a welcome addition to the Tom's Secret Formula line,” said Tom Shelby, CEO of Camie-Campbell. “In addition to giving our loyal consumers a garage-door lubricant that outperforms the competition, it provides an earth-friendly option for the environmentally-conscious customer. It's as good for the earth as it is for the metals it is used on.”

Garage Door Lubricant is formulated with optimized USA-grown vegetable oils and selective additives. The lubricant clings to surfaces and does not evaporate, providing lubrication longer than conventional petroleum-based products. Unlike typical petroleum products, all of Tom's Secret Formula products are environmentally friendly, nontoxic and provide no danger of polluting the water, soil or work environment. It has also outperformed conventional garage-door lubricants in terms of lubricity and anti-wear properties.

“This product is as safe on metals as it is on the environment,” Shelby said. “Garage Door Lubricant is a great commercial or household product that out performed the competition.”

For more than 50 years, Camie-Campbell has provided the lubrication industry with the highest quality of products at a value-driven cost. Committed to the highest level of service, quality and value to their customers, Camie-Campbell is environmentally conscious and is proud to be at the forefront of the lubrication industry.
