Tom's Secret Formula B-404 All-Purpose Lubricant

"I bought some old tools at an auction. Some of them had never seen any lubrication since they were first purchased. I cleaned them up and saturated them with B-404. After a few hours some of **the moving parts started moving again** and they looked like 'used,' not 'abused' tools. This lube worked every bit as well as some commercial products I have used."

-Todd Randol
Lee's Summit, MO

"I love the fact that a product I use a lot can finally be **natural and biodegradable**. It works as well if not better than other lubricants - I will certainly add this to my arsenal of natural products."

-Nancy Gray
Fonda, NY

"I used several of the popular brands – WD-40, Rust Off and Liquid Wrench – on **tools that had been severely corroded and rusted from Hurricane Katrina** with little or no avail. After one application of B-404, I was amazed! The tools were **restored** to their original condition and usefulness. Great product!"

-Ronald Marcus
New Orleans, LA

"**Awesome!** This product is amazing. I've worked around heavy equipment and machinery all my life using penetrating/lube products. This product works and lasts even in single digit temperatures. I would **highly recommend** this to anyone."

-William Trusty
Medford, OR

"I put some on my **hedge clippers** that are 10 years old and they cut like they were new. This lubricant is the **best thing since sliced bread!**"

-William Campbell
Dothan, AL

"Aside from the ease of use and being able to **spray 360-degrees**, I have found this to be **the best lubricant** I have ever used. **B-404 should replace WD40** and many more lubricants."

-A. Delorso
Midland, TX

"I'm an **ASE certified mechanic** and brought it to work and couldn't believe how well it works. **Made my day easier**, in fact I'm looking to purchase a case of it. I even got my key stuck in the lock – a little shot and the key came right out."

-Michael Tourangeau
Uncasville, CT

"It worked fantastic on door hinges, wheel barrow wheels, lawnmower and wagon wheels. **No sticky residue. I love it!**"

-Betty Stiefel
Clintonville, WI

"I was amazed that there was **virtually no smell**. It **worked instantly** on squeaks and on my ratchet that I work with daily. I also like the fast that it sprays upside down and I was impressed by the way it **repelled moisture**."

-Kyle Wimpee
Scottsville, KY

"I've used WD-40, Liquid Wrench and others. This product **worked SO much better** than the others. I used this product and had no problem getting rusty metal parts apart. I usually buy products I've known for years, but **I would go out of my way to find and buy this one!**"

-Ted Newman
Zimmerman, MN
